Bio Vitos Ltd Applies for ISIN Number – A Key Milestone Towards International Trading

Bio Vitos Ltd is pleased to announce that the Company has initiated the application process for an International Securities Identification Number (ISIN) for its ordinary shares.

An ISIN (International Securities Identification Number) is a globally recognized identifier for securities. It serves as a unique identification number for each security, enabling banks, brokers and financial institutions worldwide to identify, process and settle transactions in a standardized and efficient manner.

Once the ISIN has been assigned, Bio Vitos Ltd's shares can be identified and administered by international banks, brokers and other financial institutions, providing an important foundation for efficient trading and settlement.

Bio Vitos Ltd follows the UK market structure. In Sweden, trading in UK securities is primarily supported by the major banks, while some online brokerage platforms are mainly designed for securities registered through Euroclear Sweden and therefore may not support this type of UK-issued security.

Following the allocation of the ISIN, trading in Bio Vitos Ltd shares will be administered through UK brokers, who will facilitate the execution, settlement and administration of share transactions. This role is broadly comparable to the function performed by Euroclear in the Swedish market, but within the UK securities infrastructure.

The application for an ISIN represents another significant milestone in Bio Vitos Ltd's international growth strategy and strengthens the Company's position as it continues to expand its international shareholder base and prepares for the next phase of its development.
