

## PRESSRELEASE

### Bio Vitos Ltd Receives ISIN Number – An Important Milestone Ahead of Public Trading

London, 30 July 2026

Bio Vitos Ltd today announces that the Company will be assigned an ISIN (International Securities Identification Number), marking an important milestone in the process leading up to the public trading of the Company's shares.

An ISIN is an internationally standardized identification number for securities and serves as the unique identity of a share within the global financial system. The assignment means that Bio Vitos Ltd shares can now be registered with banks and other financial institutions, which is a fundamental prerequisite for future trading and administration of the shares.

#### Share Distribution to Begin in the Coming Days

Over the coming days, Bio Vitos Ltd will begin distributing shares to all shareholders' securities accounts.

To complete the transfer, the Company requires the following information from each shareholder:

- Securities account (depot) number, full name and address
- Name of the bank where the securities account is held

Please send this information by email to: [ir@biovitos.com](mailto:ir@biovitos.com)

Bio Vitos Ltd would like to inform shareholders that Avanza and Nordnet currently do not accept shares registered in England.

However, several established Swedish banks do accept UK-registered securities, including:

- SEB
- Handelsbanken
- Swedbank
- Nordea

Shareholders who do not currently hold a securities account with a bank capable of receiving UK-listed shares are therefore encouraged to contact one of the banks above to open an appropriate securities account.

The Board would also like to remind shareholders that the minimum trading price for Bio Vitos Ltd shares during the first twelve months has been set at:

£1.50 per share (approximately SEK 19.50).

The Company kindly requests that all shareholders submit their securities account details as soon as possible to ensure a smooth and efficient distribution of the shares.

The Board of Directors  
Bio Vitos Ltd
